Profile

I am a Computer Science Engineering in (AI&ML) graduate with a strong interest in programming, software development, and technology. I have knowledge of languages like C, C++, Java, and Python,HTML,CSS and I enjoy solving problems and building projects. I am a quick learner, a good team player, and always ready to take on new challenges. I am looking for an opportunity where I can apply my skills, learn from others, and grow in the IT field.

Education

B.Tech in Computer Science Engineering (AI&ML), ST.Martins Engineering college
cgpa: 7.6

Intermediate, Kakatiya jr.college
77%

Projects

Detecting Twitter Bots

- Machine Learning-based system to detect malicious Twitter bots using features like tweet frequency, follower ratio, and account metadata.
- Trained ML models (e.g., Random Forest, SVM) on labeled datasets to classify users as bots or humans with high accuracy.
- Tkinter-based GUI application for user-friendly input and real-time bot detection from Twitter profile data.

Smart Parking System

- Smart Parking Android App with full-stack integration for real-time slot booking, availability tracking, and Google Maps navigation.
- User & Admin roles with secure login, slot management, booking history, and payment features.
- Backend using Node.js/Firebase with REST APIs for data sync, and push notifications for booking updates.
